(iv) For borrowings which will be maturing before 30 June 2020, the Group will actively negotiate with banks before they fall due to secure their renewals so as to ensure that the necessary funds to meet the Group's working capital and financial requirements in the future will continue to be met. In view that there have been no history of which the banks and other lenders exercised their rights to call for immediate repayment of borrowings and their respective interests in similar cases in the past, the directors of the Company are of the opinion that the Group has good relationship with banks which would enhance the Group's ability to renew the existing short-term borrowings upon maturity.

On the basis of the successful implementation of the measures described above in the foreseeable future and after assessing the Group's current and forecasted cash positions, the directors of the Company are satisfied that the Group will be able to meet in full the Group's financial obligations as they fall due for the twelve months from 30 June 2019. Accordingly, the condensed consolidated financial statements of the Group have been prepared on the going concern basis.

Should the Group be unable to continue in business as a going concern, adjustments would have to be made to write down the carrying amounts of the Group's assets to their recoverable amounts, to provide for any further liabilities that may arise and to reclassify non-current assets and non-current liabilities as current assets and current liabilities respectively. The effects of these adjustments have not been reflected in these condensed consolidated financial statements.

2. CHA GE I ACC I G LICIE

( ) 9r 9

In the current interim period, the Group has applied, for the first time, a number of new and amendments to IFRSs issued by the ISAB which are mandatory effective for the annual period beginning on or after 1 January 2019 for the preparation of the Group's condensed consolidated financial statements. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Except as described in note 2(b), the application of the new and amendments to IFRSs in the current period has had no material impact on the Group's financial performance and positions for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

( ) IF 16 L9 9

(i) Impac and change in acco n ing policie of applica ion on IFRS 16

The Group has applied IFRS 16 for the first time in the current interim period. IFRS 16 superseded IAS 17 "Leases", and the related interpretations.

Ke change in acco n ing policie re l ing from applica ion of IFRS 16

The Group applied the following accounting policies in accordance with the transition provisions of IFRS 16.

Definition of a lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

For contracts entered into or modified on or after the date of initial application, the Group assesses whether a contract is or contains a lease based on the definition under IFRS 16 at inception or modification date. Such contract will not be reassessed unless the terms and conditions of the contract are subsequently changed.

As a lessee

Allocation of consideration to components of a contract

For a contract that contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

As a practical expedient, leases with similar characteristics are accounted on a portfolio basis when the Group reasonably expects that the effects on the financial statements would not differ materially from individual leases within the portfolio.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the recognition exemption for lease of low-value assets. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Right-of-use assets

Except for short-term leases and leases of low value assets, the Group recognises right-of-use assets at the commencement date of the lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.

The cost of right-of-use asset includes:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date, less any lease incentives received;
- any initial direct costs incurred by the Group; and
- an estimate of costs to be incurred by the Group in dismantling and removing the underlying assets, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Right-of-use assets in which the Group is reasonably certain to obtain ownership of the underlying leased assets at the end of the lease term is depreciated from commencement date to the end of the useful life. Otherwise, right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

Leasehold land and building

For payments of a property interest which includes both leasehold land and building elements, the entire property is presented as property, plant and equipment of the Group when the payments cannot be allocated reliably between the leasehold land and building elements.

Refundable rental deposits

Refundable rental deposits paid are accounted under IFRS 9 "Financial Instruments" and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

Lease liabilities

At the commencement date of a lease, the Group recognises and measures the lease liability at the present value of lease payments that are unpaid at that date. In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable.

The lease payments include:

- fixed payments (including in-substance fixed payments) less any lease incentives receivable;
- variable lease payments that depend on an index or a rate;
- amounts expected to be paid under residual value guarantees;
- the exercise price of a purchase option reasonably certain to be exercised by the Group; and
- payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate.

Variable lease payments that reflect changes in market rental rates are initially measured using the market rental rates as at the commencement date. Variable lease payments that do not depend on an index or a rate are not included in the measurement of lease liabilities and right-of-use assets, and are recognised as expense in the period on which the event or condition that triggers the payment occurs.

After the commencement date, lease liabilities are adjusted by interest accretion and lease payments.

The Group remeasures lease liabilities (and makes a corresponding adjustment to the related right-of-use assets) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the related lease liability is remeasured by discounting the revised lease payments using a revised discount rate at the date of reassessment.

- the lease payments change due to changes in market rental rates following a market rent review/ expected payment under a guaranteed residual value, in which cases the related lease liability is remeasured by discounting the revised lease payments using the initial discount rate.

Lease modifications

The Group accounts for a lease modification as a separate lease if:

- the modification increases the scope of the lease by adding the right to use one or more underlying assets; and

- the consideration for the lea3.02an8-79 Tm()0.5 (i)0.5 (cr)0.5 (id)0.5 asidlease he leuithemmidouderther (add

iii. excluded initial direct costs from measuring the right-of-use assets at the date of initial application;

iv. applied a single discount rate to a portfolio of leases with a similar remaining term for a similar class of underlying assets in a similar economic environment;

v. used hindsight based on facts and circumstances as at date of initial application in determining the lease term for the Group's leases with extension and termination options.

On transition, the Group has made the following adjustments upon application of IFRS 16:

The Group recognised lease liabilities of RMB7,238,000 and right-of-use assets of RMB12,031,000 at 1 January 2019.

When recognising the lease liabilities for leases previously classified as operating leases, the Group has applied incremental borrowing rates of the relevant group entities at the date of initial application. The weighted average lessee's incremental borrowing rate applied was 5.38%.

The Group recognised right-of-use assets at the date of initial application based on the amount equal to the lease liabilities, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the condensed consolidated statement of financial position immediately before the date of initial application.

The carrying amount of right-of-use assets as at 1 January 2019 comprises the following:

(ii) No provision for Hong Kong Profits Tax has been made for the subsidiaries located in Hong Kong as these subsidiaries did not have any assessable profits subject to Hong Kong Profits Tax during the period (six months ended 30 June 2018: nil).

(iii) Provision for the PRC Corporate Income Tax was based on the statutory rate of 25% (six months ended 30 June 2018: 25%) of the assessable profits of subsidiaries which carried on businesses in the PRC.

(iv) During the period, the directors of the Company reviewed the subsidiaries' provision for the PRC Corporate Income Tax made in previous years and they are of the opinion that the likelihood of utilisation of certain tax provision had become remote and therefore decided to release those tax provision of RMB30,785,000 (six months ended 30 June 2018: RMB48,980,000) to profit and loss.

10. EARNINGS PER SHARE

Basic earnings per share

The calculations of basic earnings per share is based on the profit attributable to ordinary equity shareholders of the Company and the weighted average number of ordinary shares in issue during the period.

The calculations of basic earnings per share attributable to ordinary equity shareholders of the Company for the six months ended 30 June 2019 and 2018 are based on the following data:

Weighted average number of ordinary shares for the purpose of basic earnings per share	**2,493,413,985**	2,493,413,985

D [illegible] r [illegible]

The calculation of diluted earnings per share is based on the profit attributable to ordinary equity shareholders of the Company. The adjusted weighted average number of ordinary shares is the number of ordinary shares in issue during the period and assumed conversion of all dilutive potential ordinary shares.

The number of shares that would have been issued assuming the exercise of the share options less the number of shares that could have been issued at fair value (determined as the average market price per share for the period) for the same total proceeds is the number of shares issued for no consideration. The resulting number of shares issued for no consideration is included in the weighted average number of ordinary shares as the denominator for calculating diluted earnings per share.

The perpetual subordinated convertible securities were assumed to have been converted into ordinary shares, and the profit for the period attributable to ordinary equity shareholders of the Company is adjusted to eliminate the distribution relating to perpetual subordinated convertible securities.

For the six months ended 30 June 2019 and 2018, the computation of diluted earnings per share has not assumed the exercise of the Company's outstanding share options since the adjusted exercise prices of these options were higher than the average market prices of shares for the outstanding period during six months ended 30 June 2019 and 2018.

The balance represents the rights to conduct mining activities in Shanxi Province. All the mine sites are located on lands in the PRC to which the Group has no formal title of ownership, hence none of the carrying amount of right-of-use assets/lease prepayments relate to these lands. The Department of Land Resources of Shanxi Province issued and renewed several mining rights certificates to the Group. Details of the Group's coal mining rights are as follows:

C m r t	**E r t9**
Xingtao Coal Mine	14 October 2020
Fengxi Coal Mine	24 January 2034
Chongsheng Coal Mine	28 December 2020
Xinglong Coal Mine	29 November 2019
Hongyuan Coal Mine	28 December 2020

The directors of the Company are of the opinion that the renewal of mining rights certificates by the relevant government authorities is highly probable as the Group submit the relevant regulation documents, fully settle the mineral exploration and mining right expense and the renewal of the mining rights certificates can be completed at minimal cost. In addition, with reference to the legal opinion from an external lawyer engaged by the Group, the Group will be able to continuously renew the mining rights and the business licenses of the respective mining subsidiaries at minimal charges.

As at 30 June 2019, the Group's coal mining rights with carrying amount of RMB4,145,881,000 (31 December 2018: RMB4,250,347,000) were pledged for the Group's borrowings (note 16).

During the year ended 31 December 2018, the Group entered into the settlement agreement with an asset management company in the PRC, to reduce the amounts of outstanding bank loans assigned by two banks and the relevant interest and penalty interest amounting to approximately RMB4,027,188,000 and RMB582,028,000 in total respectively. The management of the Group considers that the terms of the settlement agreement are substantially different as the discounted present value of the cash flows under the new terms discounted using the original effective interest rate is different from the discounted present value of the remaining cash flows of the original financial liability by more than 10 per cent. Accordingly, such modification of terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Therefore, the Group derecognised the original borrowings outstanding and recognised new borrowings measured at fair value as at the date of extinguishment. The difference between the carrying amount of the borrowings derecognised and the fair value of the new borrowings recognised amounting to approximately RMB1,904,853,000 is recognised in profit or loss for the year ended 31 December 2018. No other settlement agreement was entered by the Group during the six months ended 30 June 2019.

The settlement agreement contained a default clause which the Group will be required to repay the outstanding balance of the original borrowings and interest payable of approximately RMB4,027,188,000 and RMB582,028,000 respectively in the event of default. The directors of the Company are of the opinion that there is no event of default as at the end of the reporting period.

During the year ended 31 December 2018, certain banks assigned their bank loans, interests and penalty interests due from the Group amounting to approximately RMB543,314,000 in total and RMB112,023,000 in total to certain asset management companies in the PRC. As at the end of the reporting period, the terms of these assigned loans remained unchanged. The Group is still in the process of negotiating with the asset management companies to renew the terms of the loans assigned.

The Group's total borrowings are secured by the following assets of the Group:

In 2017, two banks filed lawsuit in Zhuhai Municipal Intermediate People's Court against the Group to demand immediate repayment of the bank borrowings of approximately RMB210,771,000 and interest charges of approximately RMB11,110,000 respectively. The principal of approximately RMB210,771,000 and respective interest charges of approximately RMB11,110,000 had already been recognised as borrowings and accrued expenses included in other payables respectively in the consolidated statement of financial position as at 31 December 2017. Pursuant to the judgement by Shenzhen Court of International Arbitration dated 28 June 2018, the Group was ordered to make immediate repayment of bank borrowings of approximately RMB62,970,000 and interest charges of approximately RMB2,700,000 due to one of the banks. Pursuant to the judgment issued by Zhuhai Principal Intermediate People's Court dated 7 July 2018, the other bank withdrawn the lawsuit. Accordingly, such litigation claim was released.

Up to the date when the condensed consolidated financial statements are authorised for issue, the remaining litigation claims are still in progress. The Group is still in the progress of negotiating with the four banks to renew its loans outstanding.

During the year ended 31 December 2017, there was a litigation claim initiated by Beijing Zhongkuang against the Group to demand immediate repayment of overdue payable in relation to production of coal and maintenance of coal mining system with an aggregate amount of approximately RMB10,547,000 and late penalty charges of approximately RMB2,084,000. The amount of approximately RMB10,547,000 had already been recognised as payable to this supplier included in other payables in the consolidated statement of financial position as at 31 December 2017.

Pursuant to the judgement of the Shenchi County Peoples Court dated 20 December 2017, the Group was ordered to make immediate repayment of payable to Beijing Zhongkuang, with additional late penalty charges of approximately RMB2,084,000. As a result of the foregoing, the Group further recognised the late penalty charges of approximately RMB2,084,000 in the consolidated financial statements for the year ended 31 December 2017. Subsequently, the Group appealed to Shanxi Provincial High Peoples Court. Pursuant to the judgement of the Shanxi Provincial Xinzhou Municipal Intermediate People's Court dated 16 April 2018, the Group was ordered to make immediate repayment of payable to Beijing Zhongkuang, with additional corresponding legal costs. As a result of the foregoing, the Group further recognised the corresponding legal costs of approximately RMB149,000 in the consolidated financial statements for the year ended 31 December 2018.

As at 30 June 2019, the payable to Beijing Zhongkuang has not been settled. In the opinion of the directors of the Company, no further provision for this litigation claim was required to be made in the condensed consolidated financial statements for the period.

(iii) Li iga ion claim rela ing o repa men o non-con rolling hareholder

During the year ended 31 December 2018, there were litigation claims initiated by the non-controlling shareholders of Xingtao Coal mine, Fengxi Coal mine and Chongsheng Coal mine against the Group to demand immediate repayment of funds provided to the Group in 2011 with an aggregate amount of approximately RMB134,414,000 before the acquisition of these coal mines by the Group. The amount of approximately RMB134,414,000 had already been recognised and offset with the amounts due from respective non-controlling shareholders in the condensed consolidated statement of financial position as at 30 June 2019. The directors of the Company are in the opinion that the Group has a valid ground to defend for the charge. Up to the date when the condensed consolidated financial statement are authorised for issue, these litigation claims are still in progress and no judgements have been available.

As at 30 June 2019, the directors of the Company are of the opinion that the provision for the above litigation is sufficient in the condensed consolidated statement of financial position as at 30 June 2019.

During the year ended 31 December 2016, there was a litigation claim initiated by Yu Lin Zhong Kuang against the Group to demand immediate repayment of overdue payable in relation to construction of coal mining infrastructure. The amount of approximately RMB101,323,000 had already been recognised as payable to this supplier included in other payables in the consolidated statement of financial position as at 31 December 2016.

Pursuant to the judgement issued by Shanxi Provincial Xinzhou City Intermediate People's Court dated 9 January 2017, the Group was ordered to make immediate repayment of payable of approximately RMB130,769,000, which including the aforesaid payable to this supplier of approximately RMB101,323,000 and late penalty charges of approximately RMB16,345,000 and interest of approximately RMB13,101,000. As a result of the foregoing, the Group further recognised the late penalty charges of approximately RMB16,345,000 and interest of approximately RMB13,101,000 in the consolidated financial statements for the year ended 31 December 2016.

On 22 February 2017, the Group appealed to Shanxi Provincial High People's Court. Pursuant to the judgement dated 21 July 2017, Shanxi Provincial High People's Court concluded that in the absence of reliable evidence on the valuation of construction work performed by the plaintiff, the original judgement was overturned and a retrial was ordered. On 9 May 2019, the court concluded the judgement of retrial that based on the valuation report of the construction work and the Group would pay less amounts than that in the judgement announced in first trial, of which payable amount of approximately RMB57,965,000. However, Yu Lin Zhong Kuang submitted appeal application of the judgement of retrial on 4 June 2019 and the appeal is still in the progress up to the date when the condensed consolidated financial statements are authorised for issue.

In the opinion of the directors of the Company, no further provision for these litigation claims was required to be made in the condensed consolidated financial statements for the period.

Pursuant to the judgement issued by Pinglu District People's Court of Zhangzhou City dated 22 March 2019, the Group was ordered to make immediate repayment of payable in relation to purchases of consumables by the Group of approximately RMB45,744,000, which including the aforesaid payable to this supplier of approximately RMB42,925,000 and late penalty charges of approximately RMB2,819,000. This payable, in addition to the corresponding legal costs of approximately RMB318,000, have already been recognised as provision and accrued expenses included in other payables respectively in the condensed consolidated statement of financial position as at 30 June 2019.

Other than the disclosure above, as at 30 June 2019, the Group was not involved in any other material litigation or arbitration. As far as the Group was aware, the Group had no other material litigation or claim which was pending or threatened against the Group. As at 30 June 2019, the Group was the defendant of certain non-material litigations, and also a party to certain litigations arising from the ordinary course of business. The likely outcome of these contingent liabilities, litigations or other legal proceedings cannot be ascertained at present, but the management of the Group believes that any possible legal liability which may be incurred from the aforesaid cases will not have any material impact on the financial position of the Group.

The Group is a non-state owned thermal coal supplier in China, and it operates an integrated coal supply chain, including coal mining, purchase and sales, filtering, storage, blending and shipping transportation. During the six months ended 30 June 2019, the Group continued to focus on these business activities. The following sets forth detailed analysis of the principal components of the operating results of the Group:

9 9 9 r m 9 tr 9m9

	m t 9 9 30 J9 9	
	2019	2018
Revenue from coal business *(RMB'000)*	**1,288,964**	1,760,793
Coal handling and trading volume *('000 tonnes)*	**3,387**	4,412

During the six months ended 30 June 2019, the volume of the Group's coal handling and trading decreased as compared to the corresponding period in 2018. The coal selling prices during the six months ended 30 June 2019 were in range between RMB127 per tonne and RMB486 per tonne, which were less than the selling prices between RMB224 per tonne and RMB697 per tonne during the same period in 2018. Average coal selling price slightly decreased, the decrease in coal handling and trading volume was principally because the Group decreased external purchase due to low gross profit margin on trading business.

The average coal selling prices and the average monthly coal handling and trading volume for each of the three years ended 31 December 2018 and the six months ended 30 June 2019 and 2018 are set forth in the table below:

The revenue for the shipping transportation segment for the six months ended 30 June 2019 was RMB39.7 million, representing a decrease of RMB52.9 million or 57.1% from RMB92.6 million for the corresponding period in 2018. The decrease in revenue was primarily due to disposal of vessel in 2018 and decrease in freight rates.

Gr r t r r t m r

The Group's gross profit was RMB190.8 million during the six months ended 30 June 2019 as compared with gross profit of RMB313.5 million during the same period in 2018. Under the circumstances of decreased average selling prices of thermal coal, gross profit margin for the six months ended 30 June 2019 was 14.36% as compared with gross profit margin of 16.92% for the corresponding period in 2018. The decrease in profit attributable to equity shareholders of the Company was mainly attributable to the decrease of average coal selling price, partially offset by decrease in the fixed unit cost due to increase in the production volume of coal mines of the Group.

[illegible] t

Net finance costs of the Group during the six months ended 30 June 2019 amounted to RMB139.3 million, representing a decrease of RMB41.5 million or 23.0% from RMB180.8 million during the corresponding period in 2018. The decrease in net finance cost was mainly attributable to the debt restructuring in the August of 2018.

r t ttr [illegible] t t [illegible] r [illegible] t C m

Profit attributable to the equity shareholders of the Company for the six months ended 30 June 2019 was RMB45.5 million, as compared with profit attributable to the equity shareholders of the Company of RMB96.8 million for the corresponding period in 2018. The decrease in profit attributable to equity shareholders of the Company was mainly attributable to the decrease of average coal selling price, partially offset by decrease in the fixed unit cost and increase in the production volume of coal mines of the Group.

B I E E IE

As a result of the improvement of the production efficiency of coal mines, commercial coal production volume was 2,846,000 tonnes, representing an increase of 18% as compared with that for the corresponding period in 2018. Coal handling and trading volume was 3,387,000 tonnes, representing a decrease of 23.2% as compared with that for the corresponding period in 2018.lume was 3

D m t m t r m t r

Based on the survey of China National Coal Association, coal consumption in China remained steady in 2019 in general. Despite the slowdown in the growth rate of the supply of thermal coal both domestically and abroad, the scale of supply still gradually expanded. The balance between coal supply and demand in China has gradually changed from "tightening" under the supply-side reform in 2016 to "easing" during the period.

E t r m r t

In the first half of 2019, the Group focused on expanding overseas coal market. In view of the Memorandum of Understanding on Building AIIB (《籌建亞投行備忘錄》) formally signed between 22 countries including China and Indonesia in 2014, which mentioned the policy on cobuilding the "Silk Road Economic Belt", to seize the prevailing opportunities and respond to the direction of national development, the Group is currently preparing for the possible investment opportunities in Indonesia. A local branch company has been set up and the Group is actively seeking opportunities to carry out investment and to export exploration technology while stepping up the efforts of sustainable development.

tr t m r t t

Strengthening mine production safety has been the Group's top priority. During the period, the Group strictly implemented high safety standard and optimised the safety management operational system. Coal mines' management personnel implemented strict and effective management on frontline production processes. At the same time, technologies on monitoring and inspection are continuously strengthened to ensure that the production standards are in compliance with the requirements of State Administration of Coal Mine Safety.

E t t r

In the first half of 2019, the Group extended the sales network and successfully entered into sales contracts with new customers, including competent state-owned enterprises and their subsidiaries. Currently, the Group's sales network covers a number of cities in China including Ordos, Ningbo, Beijing, Wenzhou, Huai'an, Hangzhou, Jiangsu, Zhejiang, Yancheng, Fujian and Shandong. The Group endeavours to build a long-term relationship with customers to expand the source of income and continue to optimise the sales network.

t tr t r t t

The Group re-examined the companies within the structure and de-registered some dormant subsidiaries so as to more effectively control the costs of maintenance and release more liquidity and resources.
